

Kinspire's Column

Not only a friend, but something much more; A guide and a role model is what we will strive for.

Kinspire UW Branch

Nicole Bohra

In the past few months, KUW successfully organized two events. The first event was a Valentine's day fundraiser where KUW sold mason jars filled with Valentine's day themed candies. The collaboration of ideas and effort by the board led to well-designed jars that attracted a large number of students. KUW is proud to announce that they sold all the jars within few hours on the first day of the sale. This event served as a great way to not only raise funds but also market for the second event, Casino Night, which was hosted a month after the fundraiser. The recently organized Casino Night event was a night filled with Casino games and food from the Mexican restaurant Agua Verde. It served as a great opportunity for the KUW volunteers to get involved and interact with the board. The event was well attended and received great positive response from everyone. Both the events combined, KUW generated a significant amount of donations (\$350), which they plan to utilize for their upcoming events.

Innovation Challenge

Kavya Magham

On the 21st of April, Kinspire will be holding its first ever Innovation Challenge! This event is an interdisciplinary hack-a-thon and fundraiser that will encourage students to collaborate and create solutions.

The purpose of our event is

- ▶ To inspire young minds to design and pioneer change through technical solutions
- ▶ Understand current state of affairs around the world and broaden other students' horizons
- ▶ Challenge students to apply their knowledge and skills to social issues and new sectors of learning.

The issues that attendees will be solving include overcoming language barriers, maintaining the children's interest in education, etc. Students will be create a

The Brothers of Sigma Beta Rho at Emory are excited to increase our involvement with Kinspire this year. Having a hand in curriculum development was meaningful to us, and now, we have been given an opportunity to work on projects that align with specific interests of our Brothers such as business networking and computer science. We are looking forward to another year of furthering education internationally!
